

Marina Gotovkina

Developer at Uppercase AS | Co-founder of Women in Tech Oslo

Having a passion for product development and building web applications, I have been fortunate to gain work experience from industries such as education, real estate, law, delivery, advertising, and headless cms over the past 3 years. I like everything that has to do with Javascript, whilst also sharing my knowledge through talks and coding workshops. A combination of tech skills and natural ability to lead gave me the confidence to co-found the Women in Tech Oslo nonprofit.

Key qualifications

Web development, frontend development, product development
Project management, leadership

Projects Experience:

References

"Marina is a technology enthusiast. She is an experienced front-end developer and has established a meet-up "Women in Technology Oslo" for people to learn various IT technologies. She was my student at the OsloMet International summer school in 2018. I am impressed with how much she has developed in developing Python programs within three months. She is constantly learning new things and has very good people skills. It is a plus to have her in a team."

October 11, 2018
Crystal Chang Din, Researcher at SIRIUS Centre for Scalable Data Access

"I worked with Marina in Women in Tech Oslo, and I must say, I have always been impressed by her leadership skills, people skills, creativity, high technical and logical skills, and she's also business oriented. On top of that she is positive, warm and funny. It was a delight working with her and I would very much recommend her."

January 9, 2020

Ingrid-Alice Bløtekjær, App Developer Student and Teacher Assistant

"Marina is a talented go-getter, idea-generator, always adding value. Throughout our lasting work relationship, she has brought professionalism, creativity, and optimism. Above all, I was impressed with her unique and innovative design and front-end programming skills as well as managerial talent together with strategic and tactical planning. A true team player! Marina would be a valuable asset to any team and she earns my highest recommendation."
